

# SafeStore Unit

## FACT SHEET

### Description

A SafeStore unit is a fully automated system of robotized safe deposit lockers contained in a high security vault that allows you to access your personal belongings anytime, day or night.

### Features

- Minimal service fee based on the size of box you purchase (size and availability varies by branch)

SIZE	FEE
1.93 x 12.80 x 9.25	\$60.00
3.27 x 12.80 x 9.25	\$100.00
4.65 x 12.80 x 9.25	\$150.00
7.32 x 12.80 x 9.25	\$200.00

- Our SafeStore units are located in a secure room right next to our ATM and can be accessed anytime using your Sunova debit card
- When you enter the SafeStore unit, the glass window becomes frosted so no one can see into the room
- Once in the room, to access your safe deposit box simply scan your fingerprint and a robotic arm will pull your safe deposit box
- When you are finished, the robotic arm will return your safe deposit box and the glass window will become clear only when you exit the room
- Each SafeStore unit includes a closed circuit television in the room allowing you to see who is outside of the door, ensuring you can exit with your personal belongings only when you are certain it is safe

### Benefits

- Peace of mind in knowing your priceless items are protected (and you always know where to find them)
- Conveniently located at our Leila, Riverbend and Oakbank branches
- Can be accessed 24 hours a day, 7 days a week
- 100% secure, the use of biometrics (scanning your fingerprint) ensures no one other than you will be able to access your safe deposit box
- As easily accessible as completing a transaction at a typical ATM
- Added security of being able to see who is outside of the room before you leave so you know it's safe
